crack free,download crack.Q: Deleting stored procedures after
compilation I have a SQL Server 2005 database and a number of
stored procedures in the database, some of which are out of date and
no longer needed. I'd like to delete all of the stored procedures and
the tables that they reference, but when I try to run the following:
EXECUTE dbo.sp_MSDropDatabase 'TestDB', 'yes' I get: Msg 209, Level
16, State 1, Procedure sp_MSDropDatabase, Line 18 [Batch Start Line
6]
