Command and conquer: Command and conquer: Generals is a computer game that was developed by Westwood Studios and released by EA Los Angeles on September 15, 2003. In Russia the game was published by Strategy First under the name Command and Conquer: Generals. The game is set in the 22nd century, 25 years after the events of the original Command and Conquer: Red Alert. Command and Conquer: Generals is the heir to Command and Conquer: Red Alert, the previous Westwood game. In Generals the player has access to all the same factions, but this time the game no longer divides the sides into communist and capitalist. In Generals the player plays as one of two sides, which are both modern armies. There are two huge factions in the game called the Earth Defense Force (DFO). Defense Force (DFO) and the Union Army (UA). Union Army (UA). Each has a separate army that can be purchased by the player and used for various missions. Each individual army can only be purchased if the player is part of the country that owns that army. You must have enough money to buy an army. All armies can be divided into three groups: infantry, cavalry and artillery. Infantry is the lightest, but the most important in combat. It is easy to move because it is light, and it has the best weapons in the game, which is the infantry's main weapon. This infantry is the main force in combat.
