also, re: reinstalling the libraries one drawback i had encountered previously with the garritan installation process is that it did not take care of these details that is, installing the.xml and.soundmap files that connect these libraries to finale. maybe theyve upgraded the garritan installers i dont really feel like going through a major download/upgrade to test it the issue is, all these things need to be moved to make your old stuff work with the new finale. i dont know, maybe using the over-write installer might have prevented this using all the old file paths but my trust level is not to the point that permits me to do that. finale is a great tool for anyone who wants to learn how to create a score. the complex rules and algorithms that finale uses for scoring music are explained in plain english in the introduction to finale chapter of the finale manual. the finale interface is clean and easy to understand. one of the really nice features of finale is that it provides a "reflow" feature to allow you to add and edit lyrics (new and existing ones) without having to manually edit the music. for example, you could add a song title or lyrics to a piece of music by pressing the add lyrics button in the toolbar. then you can drag the lyrics down below the score into a new line of lyrics. pressing the edit lyrics button will let you edit the lyrics youre currently looking at. you can also insert a new line of lyrics by pressing the add lyrics button and then pressing the add lines button. now you can move the new line of lyrics around.
