I have a problem using my Eclipse UC844 in my car. I was using it for a while, and then i had to do some maintenance on my car, and when i went to re-install it, i had to enter the code, in the ucnv 844, in order for it to work. I was able to enter the code, until i left the car a few hours ago, and when i returned, the ucnv 844 wouldn't turn on. So i changed the cds to save my previous settings, but, i am getting this error. "Pin CELLLINK-BT0 is already in use.". I have tried to take out the cds, the usb ports, and the unit, and tried to do a factory reset, but nothing seems to be working.
